

Please do not change the IN Telephone Privacy Act! I would like to see more callers removed, than added. In today's busy life, we don't need the calls to take us away from our families or home duties. I have fewer calls now and was able to drop my Privacy Manager from my phone co. This saves me money which we all want! I know there are exceptions that have been allowed, but if anything were to change, like I said, I would want more removed. I feel it is an intrusion into my home. I only let friends and family into my home. One thing that I would like to see dropped is the ability for politicians to call me with a recorded message! This irritates me and actually strikes against them instead of helping when it comes time for me to vote!!! I can't tell you the number of times this past month that I was called away from laundry, housework, my CHILDREN, just to get a recorded message from a politician that I would just hang up on. I would like the privacy act to go further in removing unwanted or invasion calls!! Like I said, ONLY friends and family are welcome into my house, whether it be via phone or in person. The intrusions have to stop! Thank you very much, Teresa Sommers
